The subject matters of claims 1-9 and 11-13 do not appear to be novel or to involve an inventive step since they are described in documents 1-4 cited in the ISR (in columns 6-8 of document 1, pages 3-5 of document 2, columns 1-6 of document 3 and columns 4-10 of document 4).

The subject matter of document 10 does not appear to involve an inventive step in view of documents 1-4, document 5 (columns 2-5) and document 6 (columns 6-11) cited in the ISR. A person skilled in the art could have easily conceived of employing the constituent feature, "the gate insulating film of a memory transistor which is thicker than the insulating film of a selection transistor," of documents 5 and 6 for the gate insulating film of documents 1-4.
